Crab Trap™

Conquer the Crab Trap™

This unique structure accommodates lots of kids all at once, offering a plethora of opportunities to climb, crawl and hang out. Attack the Crab Trap from the inside or the outside, the options are endless. Kids decide how to maneuver from one challenge to the next, for open-ended play experiences that excite creativity and critical decision-making.

A variety of aesthetically pleasing materials provides visual and tactile interest as well as novel climbing adventures, including a patent-pending braided belt. Add this statement piece to your playground and watch kids reach exciting new heights in play.

Crab Trap

Minimum area required:

33'0" x 36'6" (10,06 m x 11,13 m)

Maximum fall height:

118" (3,00 m)

- ADA compliant
- Direct bury
- Choose ProShield® colors for I-beams and components and one color for polyethylene components
- **#248479**

Also available in HDG

Hot Dip Galvanized (HDG) steel frame offers enhanced corrosion resistance for coastal environments and a cool, modern look.

- **#251054**

Braided belt is patent pending.

Our Materials Matter

ProShield® Finish

Specifically designed to withstand the demands of extreme heat, harsh climates, moisture and UV exposure, ProShield finish combines a specially formulated primer with a high-quality, architectural-grade, Super-Durable, TGIC polyester powdercoat. 100% lead free.

Polyethylene

The heavy-duty rotationally molded polyethylene material ensures strength and durability while resisting cracking, fading and peeling.

Recycled Plastic Lumber

Looks like wood but longer lasting and easier to clean. Created from 100% recycled high-density UV-stabilized polyethylene material to prevent warping in direct sun.

Textured Rubber Belting

Textured 3-ply black rubber belting with polyester fabric layers provides a grippy texture for climbing or relaxing. Braided belt is patent pending.

Handgrips

Specially designed handgrips mimic the performance and feel of those on professional climbing walls. Attached by two bolts, they stay tightly in place, reducing maintenance and providing gap-free safety for clothing and skin. With a superior grip that everyone can count on, kids feel confident whether they're climbing up, down or sideways.

Hot Dip Galvanized (HDG) Steel

The Hot Dip Galvanized distinctive zinc patina eventually takes on a matte gray appearance, blending in well with the styles of many different play environments—urban, sculptural, modern, industrial and more. Also, if you happen to live in a coastal area, this durable finish provides an extra level of protection against the harsh elements.

SS
landscape
structures®

Since 1971, **Landscape Structures Inc.** has been the leading manufacturer of commercial playground equipment in the world. Our employee-owned company designs community and school playgrounds that encourage kids of all ages and abilities to learn persistence, leadership, competition, bravery, support and empathy through play. We push the limits—of design, inclusion, play—to help kids realize there is no limit to what they can do today and in the future. For a better tomorrow, we play today.
