

SM

Is Hedra® the new shape of play?

YES, and...

it offers new inspiration with each encounter.

Is Hedra® intuitive?

YES, and...

all it requires is a little curiosity.

Is Hedra® different?

YES, and...

it can become whatever kids want it to be.

Is Hedra[®] fun?

YES, and...

kids are always discovering new ways to play.

Hedra® provides a world where the next move is always the right one. A world where kids can safely navigate via their own intuition and curiosity. Where experiences and activities can't be counted, only created.

Hedra offers the permission kids need to invent and reinvent routes, games, imaginary environments and personal bests. It is one world, with endless outcomes. A world where the answer is always

YES, and...

Endless formations of fun are rooted in the new geometric playscapes of Hedra[®], Hedra Scout and Hedra Towers. These tessellated shapes create playful pods that link together, forming a fascinating interconnected matrix of three-dimensional play.

With multiple options at any given point, each move says “YES, AND let’s see what happens next.” This type of wayfinding encourages improvisation, sparking cognitive and imaginative exploration. One day kids may find themselves climbing through a treehouse in the jungle, the next day playing three-dimensional tag or scaling a mastodon.

Along the way, kids ages 5 to 12 and 2 to 5 can experience the warmth and texture of natural bamboo, polycarbonate panels that offer colorful light play and pathways that morph into hangout spots where friends can relax.

Hedra® Swing Frame

Ages 2-5, 5-12

The Hedra® Swing Frame extends the unique geometric appearance of the Hedra playstructures to swinging fun, and can also lend visual interest to any play environment. Seats with chains and fasteners sold separately.

- Choice of ProShield® color
- Available as single bay or multiple overlapping bays (*shown*)
- Two swings per bay
- Patent pending
- Maximum fall height 96" (2,43 m)
- Minimum area required for frame only 14'9" x 28'6" (4,50 m x 8,69 m)
- #278557

Also available with one Friendship Swing included #278857

AquaHedra™

This striking, three dimensional shape with misting capabilities offers a variety of show-stopping opportunities for sites both large and small. Position the unique configuration of AquaHedra as a stunning centerpiece for your new waterpark. It also can be a novel addition to any play area or community gathering spot, welcoming users of all ages and abilities.

- Misting sprays are incorporated around the structure spraying water inside and outside
- Designed for low-flow, low-water consumption
- Stainless steel structure with stainless steel nozzles
- Choose any Aquatix® paint color

Materials Matter

A. Polycarbonate Panels

Strong, translucent panels provide visibility into the structure as well as light and color play.

B. Textured Rubber Belting

Latex-free 3-ply black rubber belting with polyester fabric layers provides a grippy texture for climbing or relaxing.

C. Bamboo

This engineered, laminated natural material adds texture and a warm aesthetic. Bamboo is a rapidly renewable and sustainable resource. Regular refinishing is recommended.

D. Rotationally Molded Polyethylene

Available in many colors, the architectural-grade pigments contain no heavy metals and provide long-lasting, UV-stable, vibrant colors. 100% recyclable.

E. Permalene®

Strong Permalene panels look like new, year after year. The distinctive black core is the result of combining and recycling colored plastic.

F. ProShield® Finish

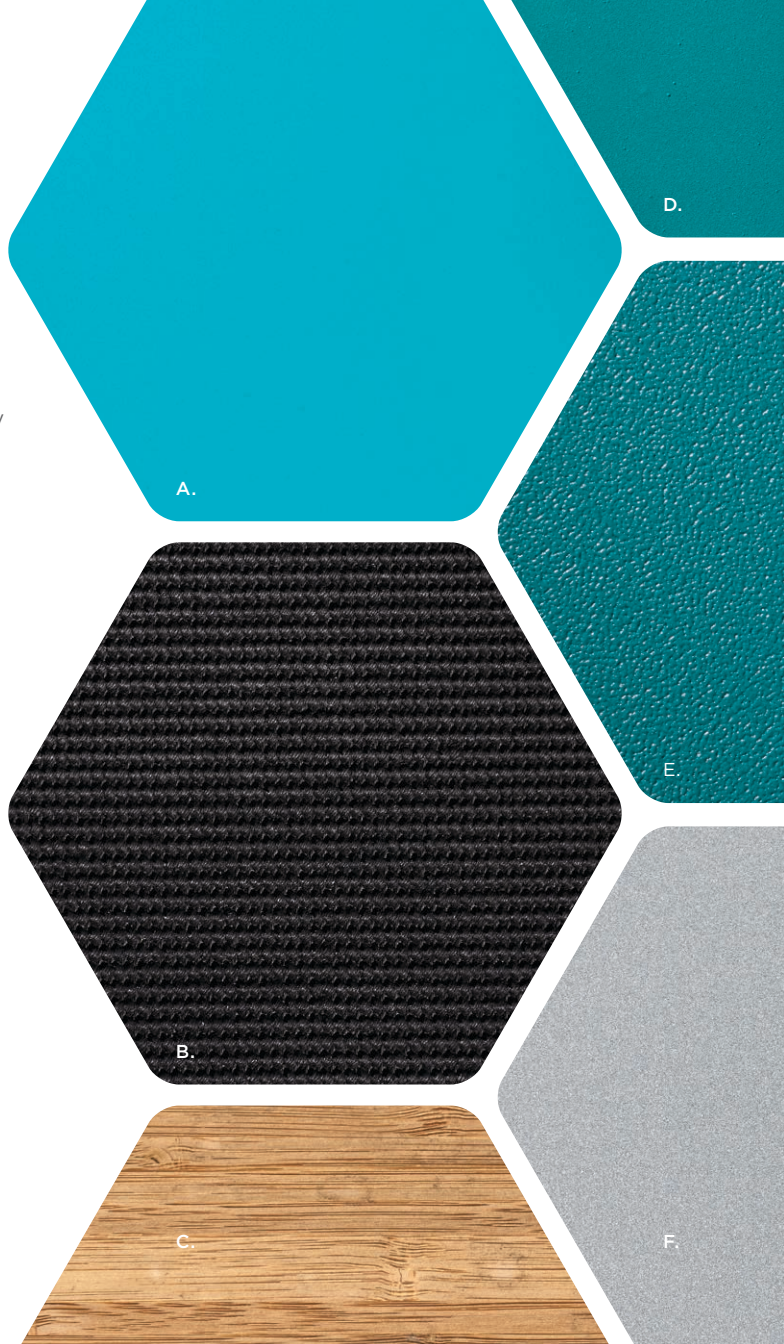

Our ProShield Finish is so tough, it substantially increases the durability of our products. The result is enhanced longevity, greater protection against UV rays, prevention from corrosion and improved product performance, all while requiring less maintenance.

G. GripX

GripX is a UV-stabilized HDPE (high-density polyethylene), marine-grade material. Specially designed slip-resistant texture enhances traction and appearance. Easy to clean and endures harsh climate conditions.

H. Steel-Reinforced Climbing Cables

Steel-Reinforced cables provide years of safe, bouncy fun. Made of tightly woven, polyester-wrapped, six-stranded galvanized-steel cable. These abrasion-resistant, color-stable cables are extremely durable and vandal resistant.

Since 1971, Landscape Structures Inc. has been the leading manufacturer of commercial playground equipment in the world. Our employee-owned company designs community and school playgrounds that encourage kids of all ages and abilities to learn persistence, leadership, competition, bravery, support and empathy through play. We push the limits—of design, inclusion, play—to help kids realize there is no limit to what they can do today and in the future. For a better tomorrow, we play today.
